

# RESEARCH ENABLED

## WELCOME TO RESEARCH ENABLED

YOUR SOURCE FOR INDUSTRY-SPONSERED COLLABORATIONS

Research Enabled quickly connects companies with faculty expertise and resources at the University of Missouri, along with the other six campuses of the UM and SIU systems to increase industry-sponsored research, collaborations, and contract work. Across all disciplines.

With the competition for federal funding continuously increasing, the University's new Research Enabled portal [ResearchEnabled.org](https://ResearchEnabled.org) connects you with industry for research funding and collaboration.

### Why should I sign up?

After you log into the portal using your university SSO ID and setting your preferences, you will receive notices for RFPs from industry partners with specific research needs in your designated areas of interest and expertise. You can submit your proposals using a simple form and also keep track of the proposal status – all online.

### Functionality includes:

- **Research Challenges.** Receive challenges for funded research projects posted by industry.
- **Requests for Expertise and Resources.** You receive requests for service from companies for contract work using research equipment or other resources that you manage, collaborations to pursue federal funding as an academic partner, production of materials needed by a company, and much more.
- **Investigator-Initiated Projects.** This is a two-way street. You can post your current research projects so companies can find out about great new ideas that they can help develop.

So, whether you're a researcher, part of a university research lab or center, or have facilities and resources available for industry use, make sure you log into Research Enabled to be notified of opportunities. It's easy!

But, if you do need help, contact Tomy Ames ([Tomy@ResearchEnabled.org](mailto:Tomy@ResearchEnabled.org)) to register for an upcoming training session or for individual assistance at any time. We can also demo the portal for your department or unit!
